MICRO-FOLIO[®]

SYSTEMS

For the
production
of microfiche
from existing roll
microfilm or, from
original material...

1

THE MICRO-FOLIO APPLICATOR — This compact unit initiates the first step, through the bonding of a crystal clear, special adhesive to the outer edges of the film roll. The time required for this phase is just three minutes per 100 ft. roll . . . both 16 mm and 35 mm film sizes are accommodated.

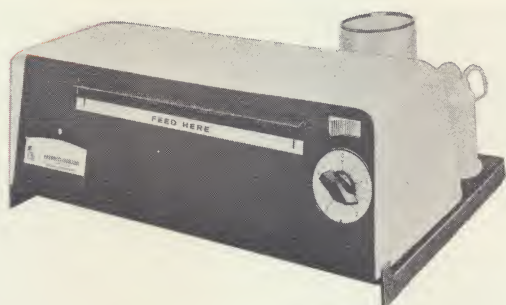

2

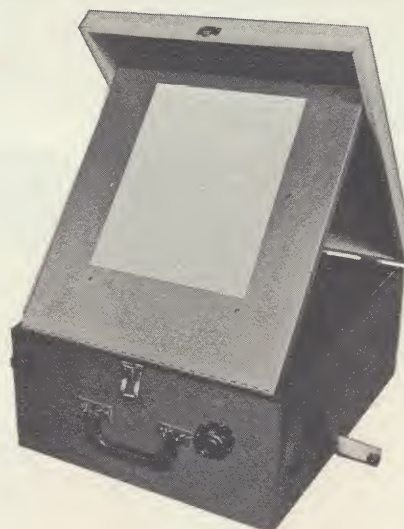

THE MICRO-FOLIO FILM MOUNTER — Removes the vinyl protective backing from the adhesive and automatically advances film for mounting on acetate sheets. This unit will accommodate any card size from: 3" x 5" to 5" x 8"; including the new 105 mm x 148 mm "government standard". Models available for either 16 mm or 35 mm film.

*MICRO-FOLIO files
remain complete and accessible
at all times!*

3

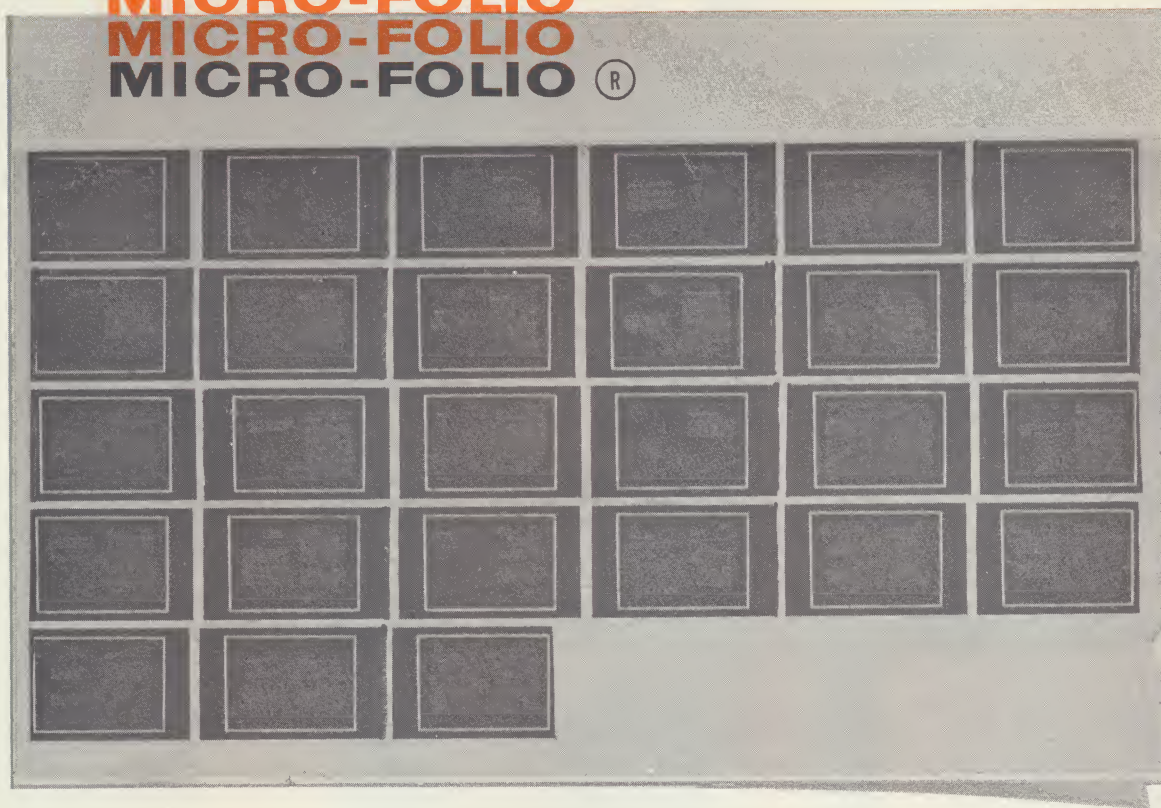

4

THE MICRO-FOLIO DIAZO PRINTER — Simple to use, desk top duplicator for producing reference copies on a demand basis, from your MICRO-FOLIO MASTERS. Reproduction copies are completely dry, fine resolution and inexpensive. The Master can then be immediately returned to its file. The Micro-Folio Diazo Printer will accept any size material up to 5" x 8".

THE MJR - 85 PORTABLE MICRO-FOLIO READER . . . at half the cost of other readers. Designed for universal use; it offers features unavailable in any other reader. Unit is completely portable and will accommodate roll film as well as MICRO-FOLIO and micro jackets . . . the perfect complement to any microfiche program.

This MICRO-FOLIO MASTER FILE CARD can provide any number of exact, completely dry, duplicate copies, quickly and inexpensively, without ever leaving the record filing area. This unique feature eliminates the dilemma of "incomplete" or "unavailable" records. Copies can be retained indefinitely or destroyed.

Complete duplicate files of indispensable records can be made as a safety measure, at minimal cost and time.

The MICRO-FOLIO System offers many other exclusive features such as:

- Inexpensive — Eliminates the necessity for expensive step - and - repeat cameras and costly hand stripping methods.
- Flexible — Any size fiche — Any reduction — Any format (16 mm, 35 mm, or combinations of both).
- Easy addition or deletion of images (impossible in other microfiche systems)
- Self performance, duplicate copies made on demand basis.
- In-Plant operation or on contract service basis.
